Hayden, ID • (208) 755-3117 • nolanrd04@gmail.com • [LinkedIn](#) • [Website](#)

SUMMARY

Computer Science graduate from Grand Canyon University (Big Data Analytics) with hands-on experience in full-stack development, machine learning, and cloud-based applications. Skilled in React, Python/FastAPI, SQL/NoSQL databases, and AWS/Azure services. Proven collaborator with leadership experience in agile teams and national advertising campaigns.

SKILLS

Programming: C#, Python, C++, Java, HTML, JavaScript, TypeScript, React, Tailwind CSS, MySQL, MongoDB, PostgreSQL, OOP, system design, Claude, Claude Code, Ollama, local model hosting, AI agents, Tailscale.

Other: Agile/Scrum (DASM certified), data analytics, statistical analysis, graphic design, MS Office.

EDUCATION

Grand Canyon University – Phoenix, AZ

April 2026

B.S. in Computer Science – Emphasis in Big Data Analytics | 3.6 GPA

Relevant coursework: Machine Learning, Data Structures & Algorithms, Operating Systems, Probability & Statistics, Linear Algebra, Digital Logic.

PROFESSIONAL EXPERIENCE

Paychex Externship: Prompt Hub Application Development

2025 – 2026

- Built a full-stack Prompt Hub for LLM prompt management using React, Tailwind CSS, FastAPI, and PostgreSQL.
- Collaborated in a 4-person agile team using Jira, Azure Web Services, and Microsoft Authentication.
- Designed APIs, managed database integration, and contributed to UI development and cloud deployment.

AWS – GCU Cloudathon: CityServe Device Sanitization System

2026

- Competed in a 2-day hackathon in a team of 5, solving a real problem for CityServe Arizona, a Phoenix-based nonprofit.
- Architected and built a guided NIST SP 800-88 device sanitization workflow with auto-generated compliance PDFs.
- Stack: React + TypeScript frontend, FastAPI backend, JWT auth, ReportLab for PDF generation, deployed on AWS.

National Student Advertising Competition, GCU

2023 – 2025

- Led research for campaigns representing Tide and AT&T in a large cross-functional student team.
- Served as project manager (Year 1) and head researcher (Year 2), driving best-practice research methodology.

Research & Development: Terraria Mod (GitHub)

2023 – Present

- Built an original C# Terraria mod with custom items, projectiles, NPCs, and sprite design.
- Produced video showcases that accumulated 100K+ views and 3,300+ subscribers on Mint Gaming Terraria.

COMPUTER SCIENCE PROJECTS

Polygon – AI-Assisted Wave Survival Game: [GitHub](#)

- Custom browser-based wave survival game with backend server validation and frontend game state management.
- Architected system structure and visual design; leveraged AI (Claude) throughout development.
- Stack: React + TypeScript, FastAPI, Vercel.

Virtual Reality Video Game:

- Fully functioning island escape VR game built from scratch.

Database Design:

- Relational databases in MySQL (Costco model) and MongoDB (Amazon model) as well as professional work with PostgreSQL.

8-bit ALU:

- Hardware design with adder, subtractor, shift registers, and memory cells.

ADDITIONAL EXPERIENCE

Content Creator – YouTube

Feb 2021 – Present

Lifeguard / Games Attendant – Silverwood Theme Park

2019 – 2022

Food Runner / Bartender / Cashier – Cochinito Taqueria

Summers 2023 & 2024

CERTIFICATIONS

Disciplined Agile Scrum Master (DASM) – Agile and iterative delivery methodologies.
